Ice Breakers | Q 4 | Page 1

There are certain unreasonable beliefs among people living in our society.

Certain common events are linked with superstitions. List such events, discuss the superstitions linked with them, and the means of their eradication.

1. Acat crossing your path
2. _____
3. _____
4. _____
5. _____

Solution:

1. A cat crossing your path

Explanation: if a cat, especially a black cat crosses your path, it is considered to be a sign that something bad is about to occur to you.

Means of eradication: educate the believers that it is just a cat and like any other animal it roams freely. Moreover, tell people that the above belief holds no logic.

2. Do not sweep or cut nails after sunset

Explanation: doing these activities after sunset invites some unwelcome misfortune into your life.

Means of eradication: educate people that sweeping or cutting nails are independent activities and have nothing to do with any particular time of the day.

3. Hanging lemon and seven green chillies

Explanation: it is believed that hanging lemon and seven green chilies on doors and vehicles wards off misfortune and bad luck.

Means of eradication: educate people that good deeds bring good fortune. So, lemons and chilies are better off as food ingredients.

4. Do not stand or sit under the Peepal tree in the night

Explanation: standing or sitting under the peepal tree at night, invites ghosts and evil spirits.

Means of eradication: educate people that plants maintain a balance in nature. Apart from oxygen, they provide shelter to numerous animals, birds, and protect them. Plants possibly do more good to us than anything evil.

5. An itchy left palm

Explanation: an itchy left palm indicates that money would flow in

Means of eradication: educate people that money is best earned and expected out of hard work and good investments. It is better to rely on such proven and tested sources of income than waiting for a palm to get itchy.

Brainstorming (A2) | Q 5 | Page 9

The astrologer has changed his appearance and his persona when he arrived in the city. Give specific reasons.

Solution: The astrologer had moved out from his native village to the city after attempting to kill a man, whom he had left for dead. He had to disguise his true identity to avoid being caught. Also, he had to make a living and begin a new life in the city after absconding from his village. For these reasons, the astrologer had to change his appearance and persona when he arrived in the city.

Brainstorming (A2) | Q 6 | Page 9

'The darkness load that was inside the astrologer has disappeared'. Through this sentence, explain the significance of the title 'An Astrologer's Day'.

Solution: The sentence 'The darkness load that was inside the astrologer has disappeared' directly relates to the title 'An Astrologer's Day'. The title seems to reflect two aspects of the astrologer's life. The first is that of a typical workday in the life of the astrologer. However, the second aspect is what the given sentence captures, i.e, the

importance of the particular day in the astrologer's life. On the said day, the astrologer found out that a man whom he had attempted to kill way back and left for dead, had actually survived. This finding must have relieved the astrologer of the guilt of committing a murder. Also, that day, the astrologer had tricked the stranger into believing that the man who had left him for dead after attempting to kill him, had himself died in an accident, and hence the latter did not have to search for him anymore to seek revenge. This must have provided the astrologer with further relief and assured him to breathe easier.

Brainstorming (A2) | Q 7 | Page 10

The astrologer feels relieved that Guru is not dead as it relieves a great burden from him. Critically justify the statement and explain it.

Solution: The astrologer feels relieved to discover that Guru is not dead. This is so because the astrologer had attempted to kill Guru in his early age and left him for dead. To know that Guru isn't dead must have acquitted him of the guilt of being an assassin. Hence, it unburdened him from the prick of conscience.

Brainstorming (A2) | Q 8 | Page 10

The astrologer wins/gets the sympathy of criticism of the reader in the end. Express your opinion with the support of the main story.

Solution:

The story portrays the astrologer as a false fortune teller with no real knowledge of his 'profession'. He attracts clients by his street-smart ways and also manages to convince them by sweet-talking to them. Moreover, he is revealed to the reader as a near-murderer towards the end of the story. However, despite all this, it's difficult to judge the astrologer as a negative character and he rather manages to win the sympathy of the reader's criticism. This is so because firstly, he has to make a living in the new city after he fled his village for fear of being caught. So, in the absence of any other skill, he must have had to adopt astrology as a livelihood under distress and not by choice. Secondly, he had to trick the stranger into believing that the man whom he was looking out for had already died in an accident, so as to protect his own life. Again, he can't be judged badly on this count because he couldn't have afforded to lose his own life at the hands

of the stranger by revealing him his true identity. Since he had his wife and child to support too, it made him lie to the stranger in order to keep himself out of harm's way.

Brainstorming (A2) | Q 9 | Page 10

If we have to eradicate the superstitions and other ill practices from our society, what steps would you like to suggest?

Solution:

In order to eradicate the superstitions and other evil practices from our society, I would first suggest taking steps to promote rational outlook amongst people. I would like to educate the masses and expose the bluff behind obscure and orthodox practices. Although I wouldn't go all-out against all traditional practices, some of them could have a valid basis. However, I would spread awareness among everyone in my social circles to keep a scientific temper and think logically rather than blindly following superstitions. I could possibly even tell them about the reasons for which some superstitions held good in ancient ages but are no longer valid.

Brainstorming (A2) | Q 10 | Page 10

In the story, astrologer has a great listening power. Listening helps in developing good relations with people. Express your opinion.

Solution:

Listening, as differentiated from hearing, is about consciously understanding and applying one's mind to what is heard. As the story illustrates, being a good listener helps one to fare better in any activity that one takes up. The astrologer isn't knowledgeable of his work but still manages to convince his customers and make his living, owing to his great listening skills. He establishes a rapport with his clients by just listening to them for a few minutes without uttering a word, while analysing their troubles and simultaneously composing his talk and answers to the clients. This helps him to mask his own shortcomings and succeed in his work, where he would otherwise not have. Hence, great listening power is a strong skillset we all should develop.

Prepare a speech on Science and Superstitions.

Solution:

Science and Superstitions Good morning respected Principal, teachers and friends. I am here to speak on 'Science and Superstitions'. Facts make for science while superstitions emerge from blind faith! There is no denying that most aspects of our lives are based on science or superstition. Science works towards exploring and rationalising the unknown and superstition work on exploiting the fear of the same. Science has been the key player in demystifying things around us and has laid a strong foundation for the development of mankind. Superstitions often stem from our religious and mythological beliefs. When people seek a desired outcome, they rely on superstitions conveniently shielded as faith! It is easier to follow a superstition than consciously avoid it! In conclusion, I think it is only fair to say that science encourages our quest for reason, while superstitions promote irrationality. Thank you all for being patient listeners.

Actions speak louder than words.

Solution: Actions Speak Louder than Words:

This ancient proverb reminds us of the importance of actions over empty talk.

Of many modes of communication, words have the strongest impact on people. However, it is the action of an individual that determines his/her character. Actions carry

considerably more weight than words in building trust. Even the minutest action reflects the manner and the nature of an individual. Actions are of tremendous importance when focusing on goals. Many individuals talk high with regard to objectives/goals, but those words prove unworthy if not backed by action. Furthermore, actions are of paramount importance when it comes to leadership. For example, if a person talks all about goodwill and deeds, but does not follow any of that in reality, he is just being vain. But the one who executes and accomplishes these deeds in actuality would be considered a trustworthy human being.

The face is the index of the mind.

Solution: The Face is the index of the mind:

The face is truly an outward projection of the mind. Any psychological shift that occurs in the brain is faithfully expressed on the face. Since a person's sentiments, moods and emotions produce strong impressions on the body language, especially the facial expressions, there are unmistakable ways in which we can decode the subtle thoughts doing rounds in that person's mind. The face is a reliable index of all the musings that are harboured in one's mind. It is a clear mirror of the psyche and the substance at once. One can fairly accurately comprehend the mental state of a person through his or her facial expressions. For instance, an individual's face marked by expressions of envy is likely to harbour dislike of something or someone. On the other hand, a content mind reflects calmness and level-headedness on a person's face. The face can hence be described as the mirror of the mind.

Speech is silver and silence is golden.

Solution: Speech is silver and silence is golden:

'Speech is silver and silence is golden' is a Latin proverb which highlights the importance of silence over speaking. In olden days, a sacred practice called 'Vow of Silence' was followed in India. As a part of this, every month, people were required to maintain total silence for a day or two. This practice was followed to develop analytical skills, sharpen objectivity and inculcate the virtue of patience. Many learned men and sages were known to follow it religiously and thereby add to their treasure of knowledge. We often see people who try to impress everyone around them with their oratory skills. Many orators are able to use the power of words in every situation. However, as the proverb advises, it is equally important to practise silence as it enables one to see the big picture, notice finer details, develop a sound mind and be able to correctly judge every situation. Hence, silence is truly golden as it assists one to become the wisest in a room full of wise men!

Read the following proverb. Share your view and expand the ideas.

The argument is the worst kind of communication.

Solution: Argument is the worst kind of communication:

The Earth is home to many plants, fishes, birds, animals, and us, humans. While all need oxygen to survive, there is one quality that separates human beings from the rest of the life on our planet. It is the ability of speech that helps us communicate with one another. Communication helps two or more people exchange their thoughts, ideas, feelings, emotions in a meaningful way. It can be done both verbally, i.e. by speaking, or non-verbally, i.e. through gestures, writing, signals or behaviour. Effective communication makes up an integral part of everyday life. Be it a simple task such as buying groceries or sharing notes with college-mates, life depends on interactions. When people don't agree with each other, they often resort to arguments to express their displeasure. This leads to complications that are a result of anger, doubt, misunderstanding, and other negative emotions. It may also end up distancing people from one another and creating negative perceptions. Therefore, the above proverb stands as a valuable advice for all those who wish to communicate effectively. When one uses the power of speech in a calm and assertive manner it proves to be a win-win situation for everyone around.

Attitudes are the real figures of speech!

Solution: Attitudes are the real figures of speech!:

Language is the enabler of speech and conversation but it is one's attitude that determines action. Language can be used to construct beautiful imagery but ultimately it is one's attitude that shapes reality. There are many situations in our daily lives where we use words mechanically, but it is equally important to understand how those spoken words are received. Figures of speech can make the language seem ornate but only when received rightly can they have the intended impact. Words can be used to create guidelines but only attitudes can create the right examples. All said and done, words are just the vehicles to drive home the intended meaning. They can be conveniently altered to fit the situation. However, one's attitude is one's inseparable companion and it is not easy to modify it in any significant way. How we receive it can in fact change what we believe, and what we believe will influence what we do! In summation, it would be fair to say that words describe but attitudes define!

Read the following proverb. Share your view and expand the ideas.

The wise man has long ears and a short tongue!

Solution:**The wise man has long ears and a short tongue!:**

Long ears signify willingness to be patient and listen keenly. A short tongue is a metaphor for self-control in allowing someone to make his point before responding to it. There are actually very few amongst us who truly listen. Most of us simply hear! When we hear, our ears only receive the sound but when we listen, we process and understand words. The given topic 'the wise man has long ears and a short tongue' is quite an apt statement because a wise man listens to respond and not to react! This works in his favour as he actually absorbs more in this case. He does not end up wasting his energies on speaking, even before he comprehends the spoken word. It is more beneficial for him in the longer run to grasp something better than merely react quickly. Let us bear in mind that getting the point is far more significant than just making a point. Don't you think it is for this reason that nature has given us two ears and just one mouth?
