1. Objective of business of the firm
2. Name and address of the firm

However, written partnership deed is desirable than oral agreement as it helps in avoiding disputes and misunderstandings among the partners. Also, it helps in settling disputes (as the case may be) among the partners, as written partnership deed can be referred to anytime. If written partnership deed is duly signed and registered under Partnership Act, then it can be used as evidence in the court of law.

- (c) Share of loss.

(d) Closing balance of capital.

Question 4:

Why is Profit and Loss Adjustment Account prepared? Explain.

ANSWER:

The Profit and Loss Adjustment Account is prepared because of the following two reasons.

1. To record omitted items and rectify errors if any- After the preparation of Profit and Loss Account and Balance Sheet, if any error or omission is noticed, then these errors or omissions are adjusted by opening Profit and Loss Adjustment Account in the subsequent accounting period without altering old Profit and Loss Account.
2. To distribute profit or loss between the partners- Sometimes, besides adjusting the items and rectifying errors, this account is also used for distribution of profit (or loss) among the partners. In this situation, this account acts as a substitute for Profit and Loss Appropriation Account. The main rationale to prepare the Profit and Loss Adjustment Account is to ascertain true profit or loss.

Question 5:

Give two circumstances under which the fixed capitals of partners may change.

ANSWER:

The following are the two circumstances under which the fixed capitals of partner may change.

- (i) If any additional capital is introduced by the partner during the year.
- (ii) If any part of capital is permanently withdrawn by the partner from the firm.

Question 6:

If a fixed amount is withdrawn on the first day of every quarter, for what period

the interest on total amount withdrawn will be calculated?

ANSWER:

If a fixed amount is withdrawn on the first day of every quarter, then the interest is calculated on the amount withdrawn for a period of seven and half () months.

Example:

If a partner withdraws Rs 5,000 in the beginning of each quarter and the interest is charged @ 10% on the drawings, then interest on drawings is calculated as:

Total drawings made by the partner during the whole year are Rs 20,000, i.e. $Rs\ 5000 \times 4$.

Interest on drawings

Question 7:

In the absence of partnership deed, specify the rules relating to the following:

- (i) Sharing of profits and losses.
- (ii) Interest on partner's capital.
- (iii) Interest on Partner's drawings.
- (iv) Interest on Partner's loan
- (v) Salary to a partner.

ANSWER:

(i) ***Sharing of profits and losses:*** If the partnership deed is silent on sharing of profit or losses among the partners of a firm, then according to the Partnership Act of 1932, profits and losses are to be shared equally by all the partners of the firm.

(ii) ***Interest on partner's capital:*** If the partnership deed is silent on interest on partner's capital, then according to the Partnership Act of 1932, **no** interest on capital should be given to the partners of the firm.

(iii) ***Interest on partner's drawings:*** If the partnership deed is silent on interest on partner's drawings, then according to the Partnership Act of 1932, **no** interest on drawing should be charged from the partners of the firm for the amount of capital withdrawn in form of drawings.

(iv) ***Interest on partner's loan:*** If the partnership deed is silent on interest on partner's loan, then according to the Partnership Act of 1932, the partners are entitled for 6% p.a. interest on the loan forwarded by them to the firm.

(v) ***Salary to a partner:*** If the partnership deed is silent on salary to a partner, then according to the Partnership Act of 1932, **no** salary should be given to any partner.

Question: 8

What is partnership? What are its chief characteristics? Explain.

ANSWER:

According to the Section 4 of the Partnership Act, 1932, partnership is an agreement between two or more persons who have agreed to share profits or losses of a business that will be carried by all or any one of them acting for all.

Person who joined their hands to set up the business are called ‘partners’ individually and ‘firm’ collectively and the name under which they carry out their business is termed as ‘firm name’.

Important Characteristics of Partnership

The following are the important characteristics of partnership.

1.Two or more persons: Partnership is an agreement between two or more persons coming together for a common goal. There should be at least two persons to form a partnership. Although as per the Partnership Act of 1932, there is no maximum limit on the number of partners in a partnership firm, but as per the Rule (10) of the Companies (Miscellaneous) Rules Act 2014, the maximum number of partners permissible is 50. Therefore, in case the number of partners exceeds the aforesaid limit, then the concerned partnership is considered to be illegal. In this regards it must be noted that Section 464 of Companies Act 2013, the maximum number of partners permissible is one hundred. However, it must be noted that the maximum number of partners is not limited in case an association or partnership is formed by professionals such as chartered accountants, lawyers, company secretaries, etc. These professionals are governed by their the special laws as formed by their respective professional institutions. Prior to the enforcement of Companies Act of 2013, the earlier act of 1956, imposed restrictions on the maximum number of partners to 10 in case of banking business and 20 in case of any other kind of business. However, with effect from April 01, 2014, Companies Act of 1956 has been replaced by Companies Act of 2013.

2. Partnership Deed: The partnership among the partners should be backed up by a partnership deed. A partnership deed is an agreement among the partners governing them in carrying out the proposed business. The deed may be oral or written.

3. Business: A partnership is formed to carry out a legal business. Partnerships in smuggling, black marketing etc. are illegal business activities and hence, the partnership is also illegal.

4. Sharing of profit: The profit or loss earned by a partnership firm must be distributed as per the partnership deed or equally among the partners (in absence of partnership deed). It is a very important feature of partnership. If a group is formed for charitable purpose, not to earn profit then this group will not be regarded as a partnership.

5. Liability: Liability of a partnership firm is unlimited and each partner is liable for firm's liabilities whether individually and jointly with other partners to the third party. Moreover, each partner along with his/her co-partners is responsible for all the acts of the partnership firm.

6. Mutual agency: Partnership may be carried on by all or any one of them acting on behalf of all. It means all the partners of a firm are equally entitled to participate in the activities of the business or any one of them who is acting on behalf of all. Every partner acts as an agent for others and binds others by his/her act and in turn is bound by others by their act.

Note: In case of any question regarding the permissible limit on the maximum number of partners in a partnership firm, the students shall take the limit as 50.

Question 9:

Discuss the main provisions of the Indian Partnership Act, 1932 that are relevant to partnership accounts if there is no partnership deed.

ANSWER:

The following are the main provisions of the Indian partnership Act, 1932 that are relevant to the partnership accounts in absence of partnership deed.

1. ***Profit Sharing Ratio:*** If the partnership deed is silent on sharing of profit or losses among the partners of a firm, then according to the Partnership Act of 1932, profits and losses are to be shared equally by all the partners of the firm.

2. ***Interest on Capital:*** If the partnership deed is silent on interest on partner's capital, then according to the Partnership Act of 1932, **no** interest on capital should be given to the partners of the firm. However, interest on capital is given only out of the profits, if mutually agreed by all the partners.

3. ***Interest on Drawings:*** If the partnership deed is silent on interest on partner's drawings, then according to the Partnership Act of 1932, **no** interest on drawing should be charged from the partners of the firm for the amount of capital withdrawn in the form of drawings.

4. ***Interest on Partner's Loan:*** If the partnership deed is silent on interest on partner's loan, then according to the Partnership Act of 1932, the partners are entitled for 6% p.a. interest on the loan forwarded by them to the firm.

5. ***Salary to Partner:*** If the partnership deed is silent on salary to a partner, then according to the Partnership Act of 1932, **no** salary should be given to any partner.

Question 10:

Explain why it is considered better to make a partnership agreement in writing.

ANSWER:

A partnership deed forms the basis of a partnership firm. A partnership deed consists of all the pre-determined terms and conditions that are agreed to by all the partners while forming the partnership. Generally the following details are included in a partnership deed.

1. Objective of business of the firm
2. Name and address of the firm
3. Name and address of all partners
4. Profit and loss sharing ratio
5. Contribution to capital by each partner
6. Rights, types of roles and duties of partners
7. Duration of partnership
8. Rate of interest on capital, drawings and loans
9. Salaries, commission, if payable to partners.
10. Rules regarding admission, retiring, death and dissolution of the firm, etc. It ensures the

A partnership deed can both be oral or written. Although, it is not compulsory to form partnership agreement in writing under the Partnership Act of 1932, however, written partnership deed is more desirable than the oral agreements. This is because it ensures the smooth functioning of the business of the partnership firm. It helps in avoiding disputes and misunderstandings among the partners. Also, it helps in settling the disputes (as the case may be) among the partners, as written partnership deed can be referred to anytime. If written partnership deed is duly signed and registered under Partnership Act, then it can be used as evidence in the court of law. Moreover, any changes (if needed) in the partnership deed cannot be made without the consent of all the partners of the firm. Therefore, it is desirable to form partnership deed in writing because of the merits associated with written documents over its oral counterparts.

Question 11:

Illustrate how interest on drawings will be calculated under various situations.

ANSWER:

When a partner withdraws any amount, either in cash or in any other form, from the firm for his/her personal use, then it is termed as drawings. The interest charged by the firm on the amount of drawings is termed as interest on drawings. The method of calculating interest on drawings depends on the information available for time and frequency of the drawings made by the partner. The following different situations of drawings made illustrate the calculation of interest charged on drawings.

Situation 1: When information regarding Amount, Date and Rate of Interest on drawings are given.

If a partner withdrew Rs 10,000 on May 01 and interest on drawing is charged at 10% p.a. and the firm closes its books on December 31 every year then interest of drawings amounts to Rs 667.

$$\text{Interest on Drawings} = \text{Total Amount} \times \frac{\text{Rate of Interest}}{100} \times \frac{\text{Period}}{12}$$

$$\text{Interest on Drawings} = 10,000 \times \frac{10}{100} \times \frac{8}{12} = \text{Rs } 667$$

Situation 2: When information regarding Amount, Rate of Interest on drawings is given

Case I: If the Amount and Rate of Interest on drawings (per annum) is given but date is not mentioned

If the details regarding the amount of drawings and rate of interest of drawings (p.a.) is given but the date of drawings is not mentioned then interest is charged on average basis and the period of drawings is taken as 6 months.

Example- If a partner withdrew Rs 10,000 and rate of interest on drawings is 10% p.a. then the interest of drawings amounts to Rs 500

$$\text{Interest on Drawings} = 10,000 \times \frac{10}{100} \times \frac{6}{12} = 500$$

Case II: If the Amount and Rate of Interest on drawings is given but the date and per annum rate of interest is not mentioned

If the date and the rate of interest are given but per annum is not specified, then annual interest is charged.

Example- If a partner withdrew Rs 20,000 and interest rate is 10% , then the interest on drawings amounts to Rs 2,000.

$$\text{Interest on Drawings} = 20,000 \times \frac{10}{100} = \text{Rs } 2,000$$

Situation 3: When a fixed amount is withdrawn at regular interval

Case I: If a fixed amount is withdrawn at the beginning of each month, then the interest is calculated for 6.5 months.

Example- If a partner withdraws Rs 1,000 in the beginning of every month and the rate of interest is 10% p.a., then the interest on drawings amount to Rs 650.

$$\text{Interest on drawings} = 12,000 \times \frac{10}{100} \times \frac{6.5}{12} = 6.50$$

Case II: If a fixed amount is withdrawn at the end of each month, then the interest is calculated for 5.5 months

Example- If a partner withdraws Rs 1,000 at the end of each month and rate of interest is 10% p.a., then the interest on drawings amount to Rs 550.

$$\text{Interest on drawings} = 12,000 \times \frac{10}{100} \times \frac{5.5}{12} = 5.50$$

Case III: If a fixed amount is withdrawn in the middle of every month then assuming that the drawings are made on 15th of every month then interest on drawings is calculated for 6 months

Example- If a partner withdraws Rs 1,000 on 15th of every month and the rate of interest is 10% p.a., then the interest on drawings amount to Rs 600.

$$\text{Interest on drawings} = 12,000 \times \frac{10}{100} \times \frac{6}{12} = 600$$

Case IV: If a fixed amount is withdrawn in the beginning of every quarter then the interest is calculated for 7.5 months

Example- If a partner withdraws Rs 3,000 in the beginning of every quarter and the rate of interest is 10% p.a. then the interest on drawings amounts to Rs 750

$$\text{Interest on drawings} = 12,000 \times \frac{10}{100} \times \frac{7.5}{12} = 750$$

Case V: If a fixed amount is withdrawn at the end of every quarter, then the interest is calculated for 4.5 months

Example- If a partner withdraws Rs 3,000 at the end of every quarter and the rate of interest is 10% p.a., then the interest on drawings amounts to Rs 450.

$$\text{Interest on drawings} = 12,000 \times \frac{10}{100} \times \frac{4.5}{12} = 450$$

Situation 4:

When different amount is at different intervals

If different amount is withdrawn by a partner at different points of time then the interest is calculated by Product Method. The period of drawings is calculated from the date of withdrawal to the last date of the accounting year.

Example- A partner withdraws Rs 5,000 on Feb 01, Rs 3000 on May 01, Rs 5,000 on Sep. 30 and Rs 1000 on Dec. 31 and the rate of interest on drawings is 10% p.a. The firm closes its book on December 31.

Calculation of Interest on Drawings by Product Method

Interest on Drawings			
Date	Amount Rs	Outstanding Period	Product
Feb. 01	5,000	11	$5,000 \times 11 = 55,000$
May. 01	3,000	8	$3,000 \times 8 = 24,000$
Sep. 30	5,000	3	$5,000 \times 3 = 15,000$
Dec. 31	1,000	0	$1,000 \times 0 = 0$
			94,000

$$\text{Interest on Drawings} = \text{Sum of Product} \times \frac{\text{Rate}}{100} \times \frac{1}{12}$$

$$\text{Interest on Drawings} = 94,000 \times \frac{10}{100} \times \frac{1}{12} = 783.33$$

Question 12:

How will you deal with a change in the profit sharing ratio among existing partners?

Take imaginary figures to illustrate your answer?

ANSWER:

Usually due to the admission, retirement or death of a partner or sometimes due to the general agreement among the partners, they may decide to change the profit sharing ratio. Various adjustments that should be considered during the change in the profit sharing ratio are, goodwill, reserves and accumulated profits, profit or loss on the revaluation of assets and liabilities and adjustment of capitals, etc. The general reserves and accumulated profits (if any) and profit (or loss) on revaluation on assets

and liabilities should be credited (debited) in the Partner's Capital Account in their old profit sharing ratio.

But if the existing partners decide to change the profit sharing ratio then some partners gain (gaining partners) at the cost of other partners (sacrificing partners). Thus, the former should compensate the latter. Therefore, the gaining Partners' Capital Accounts are debited to the extent of their gain and sacrificing Partners' Capital Accounts are credited to extent of their sacrifice. The following Journal entry is passed.

Gaining Partner's Capital A/c Dr.

To Sacrificing Partner's Capital

A/c

(Adjustment entry passed)

Example:

A, B, C are partners in a firm sharing profit and loss in 3:2:1 ratio. They decide to share profit and loss equally in future. On that date, the books of the firm shows Rs 1,20,000 as general reserve, profit due to revaluation of building Rs 30,000. The following adjustment entry is passed through the capital accounts without affecting the books of accounts.

Particulars	A	B	C
Share of profit as per 3:2:1	60,000 15,000	40,000 10,000	20,000 5,000
Share of profit as per 1:1:1	75,000 50,000	50,000 50,000	25,000 5,000
Difference (Gain or Loss)	25,000 (Loss)	-	25,000 (Loss)

Hence, in this example, C gains at the cost of A, so the partner A needs to be compensated by C with the amount of Rs 25,000. The following adjustment entry is passed.

Adjustment entry:

C's Capital A/c	Dr. 25,000
To A's Capital A/c	25,000

Question 28:

On March 31, 2017 after the close of accounts, the capitals of Mountain, Hill and Rock stood in the books of the firm at Rs 4,00,000, Rs 3,00,000 and Rs 2,00,000, respectively. Opening Capital	3,70,000	2,65,000	1,60,000

Interest on Capital

Mountain $3,70,000 \times \frac{10}{100} = \text{Rs } 37,000$

Hill $2,65,000 \times \frac{10}{100} = \text{Rs. } 26,500$

ANSWER:**Interest on Capital**

$$\text{Neelkant's} \quad 10,00,000 \times \frac{5}{100} = \text{Rs } 50,000$$

$$\text{Mahadev's} \quad 10,00,000 \times \frac{5}{100} = \text{Rs } 50,000$$

Note: In this question, as the balances of both Partner's Capital Account and of Partner's Current Account are mentioned, so it has been assumed that the capital of the partners is fixed.

As we know, when the capital of the partners is fixed, drawings and interest on capital does not affect the capital balances of the partners. Rather, it would affect their current account balances. Therefore, in this case, capital at the beginning (i.e. opening capital) and capital at the end (i.e. closing capital) of the year would remain same. Thus, the interest on capital is calculated on fixed capital balances (given in the Balance Sheet of the question).

Question 30:

Rishi is a partner in a firm. He withdrew the following amounts during the year ended March 31, 2018.

May 01, 2017	Rs 12,000
July 31, 2017	Rs 6,000
September 30, 2017	Rs 9,000

November 30, 2017	Rs 12,000
January 01, 2018	Rs 8,000
March 31, 2018	Rs 7,000

Interest on drawings is charged @ 9% p.a. Calculate interest on drawings.

ANSWER:

Product Method

	Drawings × Period	Product
01 May, 2017 to 31 March 2018	$12,000 \times 11 =$	1,32,000
31 July, 2017 to 31 March 2018	$6,000 \times 8 =$	48,000
30 September, 2017 to 31 March 2018	$9,000 \times 6 =$	54,000
30 Nov. 2017 to 31 March 2018	$12,000 \times 4 =$	48,000
01 Jan. 2018 to 31 March 2018	$8,000 \times 3 =$	24,000
31 March 2018 to 31 March 2018	$7000 \times 0 =$	0
	Sum of product =	3,06,000

Here the formula will be

$$\text{Interest on Drawings} = \text{Product} \times \frac{\text{Rate}}{100} \times \frac{1}{12}$$

$$= 3,06,000 \times \frac{9}{100} \times \frac{1}{12}$$

$$= \text{Rs } 2,295$$

Question 31:

The capital accounts of Moli and Golu showed balances of Rs 40,000 and Rs 20,000 as on April 01, 2016. They shared profits in the ratio of 3:2. They allowed interest on capital @ 10% p.a. and interest on drawings, @ 12 p.a. Golu advanced a loan of Rs 10,000 to the firm on August 01, 2016. During the year, Moli withdrew Rs 1,000 per month at the beginning of every month whereas Golu withdrew Rs 1,000 per month at the end of every month. $$= 12,000 \times \frac{12}{100} \times \frac{13}{2 \times 12}$$

$$= \text{Rs } 780$$

$$\text{Interest on Golu's Drawings} = \text{Total Drawing} \times \frac{\text{Rate}}{100} \times \frac{11}{2 \times 12}$$

$$= 12,000 \times \frac{12}{100} \times \frac{11}{2 \times 12}$$

= Rs 660

Calculate interest on Menon's drawings for the year 2006, assuming that money is withdrawn: (i) in the beginning of every month, (ii) in the middle of every month, and (iii) at the end of every month.

ANSWER:

Case (i)

If they withdraw money in the beginning of each month

$$\text{Interest of drawings} = \text{Total drawings} \times \text{Rate} \times \frac{13}{2 \times 12}$$

Case (ii)

If they withdraw in the middle of every month

$$\text{Interest on Drawings} = \text{Total drawings} \times \frac{10}{100} \times \frac{6}{12}$$

$$\text{Menon's} = 24,000 \times \frac{10}{100} \times \frac{6}{12} = \text{Rs } 1200$$

$$\text{Thomas's} = 24,000 \times \frac{10}{100} \times \frac{6}{12} = \text{Rs } 1,200$$

Case (iii)

If they withdraw at the end of every month.

$$\text{Interest on drawings} = \text{Total drawings} \times \frac{\text{Rate}}{100} \times \frac{11}{2 \times 12}$$

$$\text{Menon's} = 24,000 \times \frac{10}{100} \times \frac{11}{2 \times 12} = \text{Rs } 1,100$$

Question 39:

On March 31, 2017, after the close of books of accounts, the capital accounts of Ram, Shyam and Mohan showed balance of Rs 24,000 Rs 18,000 and Rs 12,000, respectively. It was later discovered that interest on capital @ 5% had been omitted. The profit for the year ended March 31, 2017, amounted to Rs 36,000 and the partner's drawings had been Ram, Rs 3,600; Shyam, Rs 4,500 and Mohan, Rs 2,700. The profit sharing ratio of Ram, Shyam and Mohan was 3:2:1. Calculate interest on capital.

Answer:

	Ram	Shyam	Mohan
Capital on March 31			
Add: Drawings	24,000	18,000	12,000
Less: Profit (3:2:1)	3,600	4,500	2,700
Capital April 01, 2012	(18,000)	(12,000)	(6,000)
	9,600	10,500	8,700

Here, Interest on Capital = Opening Capital $\times \frac{\text{Rate}}{100}$

$$\text{Ram's} = 9,600 \times \frac{5}{100} = \text{Rs } 480$$

$$\text{Shyam's} = 10,500 \times \frac{5}{100} = \text{Rs } 525$$

$$\text{Mohan's} = 8,700 \times \frac{5}{100} = \text{Rs } 435$$

Question 49:

The net profit of X, Y and Z for the year ended March 31, 2016 was Rs 60,000 and the same was distributed among them in their agreed ratio of 3 : 1 : 1. It was subsequently discovered that the under mentioned transactions were not recorded in the books :

- (i) Interest on Capital @5% p.a.
- (ii) Interest on drawings amounting to X Rs 700, Y Rs 500 and Z Rs 300.
- (iii) Partner's Salary : X Rs 1000, Y Rs 1500 p.a.

The capital accounts of partners were fixed as : X Rs 1,00,000, Y Rs 80,000 and Z Rs 60,000. Record the adjustment entry.

ANSWER:**Past Adjustment**

	X	Y	Z		Total

Question 52:

On March 31, 2017 the balance in the capital accounts of Eluin, Monu and Ahmed, after making adjustments for profits, drawing, etc; were Rs 80,000, Rs 60,000 and Rs 40,000 respectively. Subsequently, it was discovered that interest on capital and interest on drawings had been omitted. The partners were entitled to interest on capital @ 5% p.a. The drawings during the year were Eluin Rs 20,000; Monu, Rs 15,000 and Ahmed, Rs 9,000. Interest on drawings chargeable to partners were Eluin Rs 500, Monu Rs 360 and Ahmed Rs 200. The net profit during the year amounted to Rs 1,20,000. The profit sharing ratio was 3 : 2 : 1. Pass necessary adjustment entries.

ANSWER:

In this question interest on capital shall be calculated on opening capital

Question 53::

Azad and Benny are equal partners. Their capitals are Rs 40,000 and Rs 80,000, respectively. After the accounts for the year have been prepared it is discovered that interest at 5% p.a. as provided in the partnership agreement, has not been credited to the capital accounts before distribution of profits. It is decided to make an adjustment entry at the beginning of the next year. Record the necessary journal entry.

ANSWER:

$$\text{Benny} = 80,000 \times \frac{5}{100} = \text{Rs. } 4,000$$

Question 54:

Kavita and Pradeep are partners, sharing profits in the ratio of 3 : 2. They employed Chandan as their manager, to whom they paid a salary of Rs 750 p.m. Chandan deposited Rs 20,000 on which interest is payable @ 9% p.a. At the end of 2017 (after the division of profit), it was decided that Chandan should be treated as partner w.e.f. Jan. 1, 2014 with 1/6 th share in profits. His deposit being considered as capital carrying interest @ 6% p.a. like capital of other partners. Firm's profits after allowing interest on capital were as follows:

	Rs.
2014 Profit	59,000
2015 Profit	62,000
2016 Loss	(4,000)
2017 Profit	78,000

Record the necessary journal entries to give effect to the above.

ANSWER:

Interest on Loan + Salary = Total						
2014	59,000	+	1,800	+	9,000	= 69,800
2015	62,000	+	1,800	+	9,000	= 72,800
2016	(4,000)	+	1,800	+	9,000	= 6,800
2017	78,000	+	1,800	+	9,000	= 88,800
	1,95,000	+	7,200	+	36,000	= 2,38,200

Chandan received as Manager = Interest on Loan + Salary

$$= 7,200 + 36,000 = \text{Rs } 43,200$$

Total Profit of 4 years before interest on Chandan's Loan and Salary = 2,38,200

Interest on Chandan's Capital for 4 years = $\{20,000 \times (6/100) = 1,200\}$

$$= 1,200 \times 4 = \text{Rs } 4,800$$

Profit after interest on all partners Capital

= Total Profit of four years before interest on Chandan's loan and Salary – Interest on Chandan's Capital for four years

$$= 2,38,200 - 4,800$$

$$= \text{Rs } 2,33,400$$

Wrong Distribution – Distribution of 4 years

Profit when Chandan as a Manager

$$\text{Kavita } \{ 1,95,000 \times (3/5) \} = 1,17,000$$

$$\text{Pradeep } \{ 1,95,000 \times (2/5) \} = 78,000$$

Chandan received as manager = Interest on Loan + Salary

$$\begin{array}{rcl} = 7,200 + 36,000 & = & 43,200 \\ & & \hline & & 2,38,200 \end{array}$$

Right Distribution – Division of Profit when Chandan as Partner

Chandan Share of Profit $\{2,33,400 \times (1/6)\}$	38,900
Interest on Capital	4,800
	43,700

Kavita's Share of Profit $\{(2,33,400 - 38,900) \times (3/5)\} = 1,16,700$

Pradeep's share of Profit $\{(2,33,400 - 38,900) \times (2/5)\} = 77,800$

Adjustment of Profit
